Proficient in front-end development with HTML, CSS, and intermediate JavaScript. Actively developing backend capabilities with Node.js, contributing to a comprehensive understanding of full-stack web development.

Skills

Web Development

- HTML5, CSS3 and JavaScript.
- Able to create HTML pages with a clear structure, include functional elements, and apply unique styles.
- Capable of using third-party APIs, reading through their documentation.

Basic Python

- Capable of writing, maintaining, and debugging Python code.
- These are some simple tasks I have completed with my Python knowledge.

Version control systems (VCS)

- Proficient in utilizing Git for code management, including version control, branch management, and conflict resolution.
- Familiar with core Git commands and best practices for maintaining a clean and organized repository, ensuring efficient code collaboration.

Projects

Python Projects	Web Development
1. Python Mini Projects : I have worked on improving my Python skills and created a few interactive console apps to demonstrate my command of the language.	1. Frontend Development : Through a tool called Frontend Mentor, I have honed my web programming skills by creating websites and web pages. For developers of all skill levels, Frontend Mentor is a platform that offers real-world front-end programming challenges. It enables you to create projects with JavaScript, HTML, and CSS.
