GitHub: https://github.com/hafizurrahaman0

SKILLS

- HTML: Can write well-maintainable and well-structured, semantic HTML.
- CSS: position properties, flexbox, grid.
- JavaScript: reusable functions, DOM manipulation.
- Bootstrap.
- TailwindCSS.
- SASS: CSS preprocessors.
- Git: basic use of git workflow.
- GitHub: I used GitHub to share my projects.

Projects

- **Frontend Mentor** is a platform that provides real-world front-end development challenges for developers of all skill levels. It allows you to build projects using HTML, CSS, and JavaScript while focusing on best practices like responsive design, accessibility, and performance optimisation. The platform offers challenges ranging from beginner to advanced levels, helping developers enhance their skills by working on practical, portfolio-worthy projects.
  https://hafizurrahaman0.github.io/Frontend-Mentor/

- **WebMiniProjects** is a collection of simple and creative web projects where I've applied my knowledge of web development techniques and tools. These projects include recreating existing websites or building new web applications from scratch. Each project showcases my skills in HTML, CSS, JavaScript, and other web technologies, focusing on clean design, functionality, and user experience. It's a way for me to learn, practice, and improve as a web developer.
